

## Intent Statement – Design and Technology

Our D & T curriculum is intertwined across all phases throughout the pedagogy of our whole school. D & T is embedded within our curriculum and is deeply linked with all the STEM opportunities we utilise within our versatile curriculum. D & T is a superb opportunity to show creativity, ingenuity and innovation within our superb curriculum. When teaching D & T, we quickly figure out the purpose of our design and we then use the fundamentals of 'research, design, make and evaluate' in everything we teach and learn.
